Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet **within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee et al. (US 20050159868 ; 20050137768 ; and 20050102078) all teach related method for measuring an absolute steering angle of a steering shaft for a vehicle.

This application is in condition for allowance except for the following formal matters: as to the abstract as discussed above.
